In response to the interview with applicant and applicant's attorney 8/30/05 and in view of the amendment filed 9/8/05, the examiner has conducted a more extensive search.

Claims 1-5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In the penultimate line of claim 1 applicant describes the first and second support members as being parallel to the wall. This, however, is not correct. The first and second support members are *perpendicular* to the wall. The first and second frame members are *parallel* to the wall.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5 (in so far as understood) are rejected under 35 U.S.C. 102(b) as being anticipated by Konigsford et al. 4,109,795. Note Figure 1, support elements 6 and recesses 16.

Claims 6-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Stein et al. 5,597,150. See Figure 1 and the two recesses on the support elements.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Similar wire racks are illustrated by Wilcke 3,285,426; Larson 4,094,415; Niven 5,014,949; Leurdijk 6,050,426 (See Figure 15); Plutsky 6,612,448; Calvert 4,905,846.

The examiner has considered applicant's remarks but are considered moot in view of the new grounds of rejection.
